

Recycled Concrete Aggregates

Available at many of our Aggregate Locations.

Recycled concrete is...

- A great alternative to crushed stone or gravel for all your base material needs.
- More cost effective than other base materials - you could save up to 30% over conventional base materials!
- An sustainable material. By recycling concrete and bituminous materials, thousands of tons of re-usable materials out of our landfills.

Cemstone offers recycled concrete in 3" form. This new product will work for all the MPCA construction entrance requirements. This is a great costs savings alternative to crushed stone.
